Damstra’s FinOps Challenges

As a cloud-native business, Damstra faced multiple FinOps challenges, including:

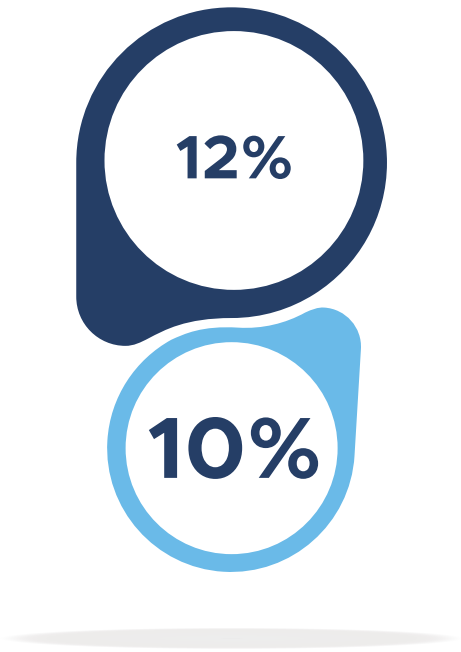

Workloads distributed across multiple teams and geographies.

Engineering teams focusing on new releases and enhancements, and cost optimization being deprioritized.

Notable savings delivered, right from Day 1

Damstra started their engagement with CloudKeeper in July 2020.

Immediate Savings of 12% from 1st day

Damstra started seeing savings of up to 12% on their entire AWS bill, right from Day 1.

CloudKeeper helped them optimize their AWS Reservation Management.

Additional Savings of 10% by architectural optimization

- Moving applications to latest generation instances
- Network tuning to reduce data transfer
- Architectural changes in load balancer setup

Other Notable Highlights

Implemented in-depth Cost Analytics and Reporting

Well Architected Reviews

Anomaly Detection

Customer Speaks

Cloudkeeper really helps us keep control of our cloud costs in a simple and concise format. It is easy to track down cost increases and anomalies across all of our cloud accounts.

Damien
CTO, Damstra

About CloudKeeper

CloudKeeper is a FinOps & Cost Optimization solution that offers instant and guaranteed savings of up to 25% on the entire cloud bill.
